Welcome to 5th grade! Here is a small math packet for you to do over the summer. You should aim to do a few problems each day to keep your math mind awake. Please use separate paper to show your work. Number the problems on your paper and hand it in with the math packet in the first few days of the school year, Mrs. Maddox will be so excited to see what you did!

If you want to play a card game, take a deck of cards and remove the face cards(Jack, Queen King). Aces are one. Divide the pack up evenly between players. Each player flips over a card and does the multiplication problem. The one with the correct answer first wins and takes the cards. The one with all the cards wins (or the most cards if you play using a timer).

You can play this game with dice as well. For each correct answer you get 1 point. For the person who gets the correct answer first, they get 2 points.
