

Add a Printer to your MacBook

1. Click on System Preferences  on your Dock
2. Then, click Print and Scan  in the menu
3. Then, click the + button to add a printer. 
4. Select the printer you wish to install from the list.
5. Choose either AirPrint or Generic.
6. After you click Add, you may be presented with any one of several different menus to complete the printer installation. Choosing either AirPrint or Generic PCL will allow you to install the printer without actually installing a driver.
